

ASIN M K

BE – COMPUTER SCIENCE AND ENGINEERING(IoT)

No 5, Old Meenakshi Nagar, Madurai | Mail id: asykumaran@gmail.com | Mobile No: 9342251776

SUMMARY

Computer Science undergraduate with Specialization in Internet of Things, and Strong Interest in Data Analytics, and IoT systems. Proven experience in developing IoT-enabled smart solutions , visualizing the raw data with meaningful insights and applying machine learning for practical problem-solving. Seeking to contribute to advanced research and high-impact technological innovation.

EDUCATION

Higher Secondary Certificate (HSC) – Class XII

School Name: Nirmala Girls hr.sec.School

Year of Completion: 2023

Percentage: 81.6%

Bachelor of Computer Science and Engineering(Internet of Things) 2023-2027

Pursuing B.E.CSE(IoT) in K.L.N. College of Engineering in 3rd

year **CGPA** : 8.49/10 (upto 6th semester)

TECHNICAL

Data Preprocessing
Churn Analysis in Data Analytics
Data Visualization

Sensor Integration
Machine Learning
Programming - Java

SOFT SKILLS

Analytical Thinking and Problem solving
Team work and collaboration

PROJECTS

Sensor Integration based Power Management System

- Designed and implemented a multi-sensor IoT-based energy monitoring system using ESP32, generating real-time datasets stored in Google Sheets. Conducted data analysis and visualization, and applied ARIMA time-series modeling to forecast power consumption trends.

Smart Mentor

- Developed “Smart Mentor,” an AI-enabled academic support system to streamline student Activities and mentor inputs. Built a structured framework focused on student-centric academic guidance

Virtual Air Writing

- Designed and implemented a Virtual Air Writing system using Python and OpenCV to capture hand gestures via webcam and convert motion into digital text.

Home Automation System

- Developed a touch-based home automation system using a relay module to replace traditional switches. Designed a custom 3D-printed enclosure for safe and practical implementation.

Mobile-to-LoRa Communication Without SIM Card (Hackathon Project)

- Built a secure offline messaging solution using ESP32, LoRa, Bluetooth, and Wi-Fi technologies For communication in remote and Military Environments

INTERNSHIP

- IoT and Robotics Intern - Tarcin Robotics (Period- 1 Month Offline)
- AI-Powered Data Analytics Intern - Excelerate (Period- 1 Month Virtual)
- Machine Learning Intern-Sysslaan IT Solution(Period-1month Remote)
- K.L.N. Innovation & Research Park - (Period- 1 year KLNCE)

Worked on embedded systems, sensor integration, data analysis, and machine learning model

implementation, gaining hands-on experience in real-world technical applications.

ADDITIONAL INFORMATION

- **Languages:** Tamil, Sourashtra, English, Hindi
- **Publications:** "Sensor Integration Based Power Management System" *IJSRSET, 2026*
- **Certifications Course:** Completed 1month master class in UI/UX , Completed Data Visualization course, AI Skills Passport course by Microsoft, NPTEL Certification on Large language Model(LLM).
- **Workshop:** Design Thinking Workshop, Cloud Technologies, IoT and Embedded Workshop
- **Expo :** Participated in a Project Expo conducted by Sourashtra Chamber of Commerce, presenting an IoT-based project.

Achievements :

1. Successfully Organized Engineers' Day celebrations at the college level.
2. Organized National Science Day events and coordinated student activities.
3. Qualified up to Round 3 of the IITJ Hackathon, competing with teams from various institution
4. Won 1st Prize in a Technical Event at an Inter-College Symposium.
5. Best performer in a Embedded Workshop held by Tarcin Robotics.
6. Participated in a Niral Thiruvizha- Concept: Wildlife Intrusion Detection System.
